

# HistoPot mini

*Fine needle biopsy fixation*

Introducing **HistoPot mini**:

The first **(10% Buffered Formalin)** pre-filled specimen container specifically designed for the fixation of fine needle biopsies.

# HistoPot mini

*Fine needle biopsy fixation*

In the past Histology & Pathology laboratories have had to use large pre-filled specimen containers for fixation of fine needle biopsy samples. This practice has posed major difficulties retrieving the minute sample for investigation. HistoPot mini resolves this issue.

**Coupled with Serosep's new visualisation technology even transparent biopsies are now visible and easily retrievable.**
