VACUETTE®

QUICKSHIELD

Safety Tube Holder

“Do the Twist”

VACUETTE® QUICKSHIELD Safety Tube Holder

Do the twist

More flexibility – as offered by the new **VACUETTE®** QUICKSHIELD Safety Tube Holder.

The safety shield of the newly designed holder can now be positioned in any direction. As per the slogan “Do the twist”, right-handed and left-handed users can now rotate the safety shield to the position that suits them best.

The rotating safety shield ensures:

- clear visibility of the entire puncture site
- greater flexibility to adapt as effectively as possible to any situation

For daily blood collection procedures

The **VACUETTE®** QUICKSHIELD Safety Tube Holder from Greiner Bio-One is especially suitable for routine blood collection. There is no change to the usual collection technique, and the safety shield is activated either one-handed with the aid of a solid surface or with the thumb. This product can provide the user with the simplest handling and reliable infection protection.

The ergonomic design of the holder gives fingers a better grip for puncturing.

The safety shield is pre-assembled directly on the holder. The shield is to be manually activated upon removal of the needle from the patient's vein.

Without the need to change collection technique, the **VACUETTE®** QUICKSHIELD Safety Tube Holder helps prevent needlestick injuries.

VACUETTE® QUICKSHIELD can be used with either **VACUETTE®** Multiple Use Drawing Needles or **VACUETTE®** VISIO PLUS Needles. Both cannulas have a special needle tip bevel that ensures optimum puncturing of the skin. The dot on the protective needle cap is aligned with the needle bevel. This serves as an indication of the bevel position so that the user can adjust the shield to a preferred position without having to remove the protective cap.

Advantages of the **VACUETTE® QUICKSHIELD** Safety Tube Holder:

- Greater flexibility in regards to user and patient-specific requirements thanks to the rotating safety shield.
- Activated with the aid of a solid surface or thumb.
- Comfort through one-handed activation.
- Safety product suitable for compliance with European Directive 2010/32.
- Dot on the protective needle cap serves as an orientation aid for the needle bevel.
- No changes to collection technique.
- An audible click indicates to the user that the safety shield has been fully activated.
- Can be used with equal ease by both left-handers and right-handers.
- Clear tube holder to differentiate from non-rotatable version.

Instructions for Use *

1 Thread the needle

2 If desired, re-position safety shield

3 Remove protective needle cap

4 Venipuncture

5 Insert the tube

6 Remove the tube

7 Activate the safety mechanism
(with the aid of solid surface or thumb)

8 Audible click indicates activation

9 Disposal

The **VACUETTE**® QUICKSHIELD Safety Tube Holder, together with the **VACUETTE**® Blood Collection Tubes and needles, is suitable as a safe single-use system for everyday venous blood collection.

* For the complete handling recommendation please refer to the Instructions for Use for each product.
