NEW: VACUETTE® Super-T Tourniquet

Dear **VACUETTE®** Distribution Partner,

The new **VACUETTE®** Super-T disposable tourniquet from Greiner Bio-One is super practical and super simple. This product's most striking feature is just how easy it is to use. With the notched design, a simple pulling motion is enough to fasten the tourniquet on the patient's arm. Removal is just as straightforward and is carried out by pulling the other end of the tourniquet.

This product is designed for single-use, meaning that both the patient and the person drawing blood are protected against the risk of potential cross-contamination, such as an MRSA infection.

Super-T has the following features:

- Easy to use
- Single-use
- Protection against cross-contamination
- Soft silicone material
- Virtually tearproof
- Latex-free and non-DEHP
- Practical packaging
- Easy removal from the box
- Lightly powdered

This new disposable tourniquet is available to order from us now under the following item number:

Item N°	Description	Packaging	
		Inner	Outer
840056	VACUETTE® Super-T Disposable Tourniquet	80 pcs.	160 pcs.

Prices are set in each case by the responsible export manager. For more information on the new **VACUETTE®** Super-T tourniquet, please do not hesitate to contact us by telephone or send an email to our office address: office@at.gbo.com

Yours sincerely,
Greiner Bio-One
