

Sapphire

PCR Consumables

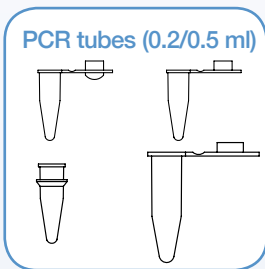

PCR At Its Best

Greiner Bio-One launches a new PCR product line under its brand name Sapphire. The Sapphire PCR product portfolio comprises a full range of PCR reaction vessels and microplates for all major PCR applications.

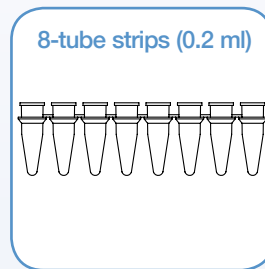

Key Facts:

- Manufactured out of medical-grade polypropylene without interfering additives
- Thin-walled for efficient heat transfer during amplification
- Free of detectable DNase, RNase, human DNA, endotoxin and PCR inhibitors
- Suitable for real-time / quantitative PCR
- Comprehensive thermal cycler compatibility
- Packaging labelled with product symbols for easier working and warehousing

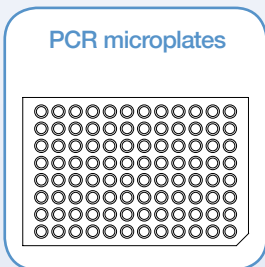

PCR tubes (0.2/0.5 ml)

- With flat or domed cap or without cap
- Available in different colours
- Frosted tube caps for easy labelling

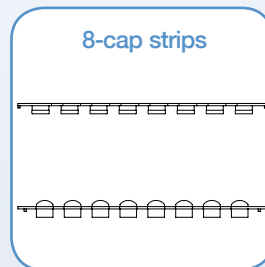

8-tube strips (0.2 ml)

- Available in different colours
- Comprehensive thermal cycler compatibility
- Suitable for 8-cap strips

PCR microplates

- 96 / 384 well without skirt, half-skirt and full-skirt
- Comprehensive thermal cycler compatibility
- Suitable for 8-cap strips, adhesive sealers and heat-sealing
- Coloured alphanumeric printing for rapid sample identification

8-cap strips

Flat ultraclear 8-cap strips

For real-time / quantitative PCR

Domed 8-cap strips

Available in different colours

2 Fit All

Both 8-cap strip versions are compatible with all Sapphire 96 well PCR microplates and Sapphire 8-tube strips
