

Safely remove and contain scalpel blades.

Clicksmart blade removers provide a simply safer way to remove and contain scalpel blades. These world-first single-handed blade remover products remove blades simply with a **push and click**.

Start ticking some boxes in your industry.

SAFETY

Why put yourself at risk of injury or infection when there are options? You have the choice, *choose safety*.

COMPLIANCE

In the United States alone there are a reported 600,000 to 1 million sharps injuries per year. Many more go unreported. Occupational health and safety regulations worldwide are responding!

SAVE MONEY

It is significantly cheaper to use a blade removal system than to have an injury. An uncomplicated injury can cost around \$5,000. An injury complicated by infection has cost up to \$12.2M.

A blade removal system is also cheaper than disposable scalpels. For example, you will save up to US\$225 by replacing plastic disposable scalpels with one BladeFLASK.

Scalpel Safety

Protect yourself from injury and exposure to HIV/AIDS, Hep C, Hep B.

World's first single handed blade removers.

BladeFLASK

100 | Scalpel Blade Removal System

Clicksmart BladeFLASK is the world's first single-handed scalpel blade remover. This multi-use safety solution for scalpel blade removal, containment and disposal avoids the unacceptable sharps injury rates of two-hand removal techniques involving fingers, forceps or re-sheathing. With BladeFLASK you can simply 'push and click' to remove and contain contaminated blades without risking the other hand. It is a simply safer way of removing blades.

BladeFLASK features:

- puncture proof sharps container
- safe to dispose when full
- holds 100 blades, and has a counter
- quick, safe, simple.

BladeNeedleSYSTEM

Blade Remover | Needle Counter

Clicksmart BladeNeedleSYSTEM combines the world's best single-handed scalpel blade removing technology with the universal needle counter. It removes contaminated scalpel blades, contains and enables accurate counting of both used scalpel blades and suture needles in sterile field. BladeNeedleSYSTEM prevents the dangerous injuries commonly caused by removing blades with fingers, forceps, re-sheathing or other two-handed blade removers.

BladeNeedleSYSTEM features:

- contain and count suture needles.
- wide base and non-residual adhesive tape for stability.
- circular holder allows blade remover to face in any direction.
- transparent cartridges, easy counting of blades.
- Gamma radiation sterilisation.
- can be used in sterile packs.

BladeCASSETTE BladesINGLE

3in1 | Blade Remover

One | Blade Remover

Clicksmart BladeCASSETTE and BladesINGLE are single-handed scalpel blade removers for sterile operating environments. Avoid the unacceptable sharps injury rates of two-hand removal techniques involving fingers, forceps or re-sheathing. With the single-use BladeCASSETTE and BladesINGLE you can simply 'push and click' to change and contain blades during an operation without risking the other hand. Each BladeCASSETTE can remove three scalpel blades and each BladesINGLE removes one scalpel blade.

BladeCASSETTE and BladesINGLE feature:

- Single-handed blade removal.
- ETO or gamma radiation sterilisation.
- transparent cartridges, easy counting of blades.
- can be used in sterile packs.
