

Ampoule cuts are painful and can cost you time and money but there is a better way.

Healthcare workers in the US alone report between 600,000 and 1 million sharps injuries per year. Many more go unreported. Over one quarter of sharps injuries occur while opening glass ampoules.

Here at Qlicksmart we have been on the job developing the best ampoule opener on the market, so now ampoule opening is as easy as 1, 2, 3...

1. INSERT the ampoule lid into the SnapIT.
2. SNAP open the ampoule.
3. EJECT the ampoule lid directly into a sharps bin.

Qlicksmart SnapIT is a simply safer way to open glass ampoules. These easy-to-use multi-use ampoule openers avoid the unacceptable, painful and dangerous sharps injuries seen when ampoules are opened by hand.

...plus, SnapIT really is easier than using your fingers!

How do I protect my colleagues and myself from injury and risk?
