

# HistoPot

## taking fixation of biopsy samples to a higher standard

**Ready to Use, Cost Effective,  
Facilitating Lean Processing**

Our comprehensive range of pre-filled specimen containers for use in histology and pathology laboratories are manufactured to the highest standard, using quality state of the art production techniques, in a certified manufacturing facility.

Serosep's new sample visualisation technology allows the Pathologist to visualise any needle size transparent biopsy sample that has been entered into the fixative easily. The technology will not affect any of the steps in the Histology process, it just attaches to the surface of the biopsy for visualisation purposes.

**NEW: HistoPot Sample  
Visualisation Technology**
